

Is this the view you want to see when you walk, jog, or bike along Ralston Creek?

Major concerns to developing a rv storage lot on a closed, unregulated landfill adjacent to ralston creek

- Increased light pollution and heat islands
- Methane emissions and probable subsidence issues from organic decay in landfill
- Possible pollution to groundwater and eventually to creek water
- Increased fire hazard---propane, gasoline, methane
- Decreased wildlife---birds, insects, coyotes, foxes
- Incompatible with city plan for trail beautification and 2014 Arvada comprehensive plan
